Index to Volume LII

Journal of Heredity, 1961

A

Abbott, U. K. and V. S. Asmundson, Dominant Sex-Linked Late-Feathering in the Turkey, 99.

Abdullah, Mohammad: Inheritance of Dieldrin Resistance in the Housefly, 179; Correction, 199.

Adams, James C. and Lavon J. Sumption, Multiple Sire Mating in Swine, III. Factors Influencing Multiple Paternity, 214.

Anderson, I. C. and Donald S. Robertson, Temperature-Sensitive Alleles of the Y_1 Locus in Maize, 53.

Animal Genetics:

Cats: pink-eyed dilution, 202; inheritance of taillessness in Manx, 228; correction, 278.

Cattle: genetic analysis of the double cervix condition, 26; pedigree analysis of Aberdeen-Angus, 129; inheritance of hydrocephalus, 135; world distribution of major types, 207; cryptorchidism in Hereford, 244; factors affecting spotting in Holstein-Friesian, association of head pattern and amount of pigmented body area, 250.

DNA, preparation and parenteral administration from fowl erythrocyte nuclei, 105.

Drosophila: spontaneous mosaic, 34; viability and reproductivity of superfemales, 61; expressivity of a midget mutant, 76; interchromosomal effects on crossing-over induced by reversed acrocentric compound X-chromosomes, 160; sex combs in unbalanced male forms, 255.

Ducks, snow-white down, 237.

Fowl: paroxysm—a sex-linked lethal, 47; preparation and parenteral administration of DNA from erythrocyte nuclei, 105; breed differences in storing chicken semen, 119; chicken-quail hybrids, 167; Reds hatch chickens à la Russe, 291.

Frog, study of spotting patterns in leopard, effect of gene dosage, 301.

Grasshopper, inheritance of diapause in eggs, 39.

Horse, genetics of the Claybank Dun, 121.

Housefly: inheritance of Dieldrin resistance, 179; correction, 199; linkage and sex limitation of several loci, 282.

Mammals, effect of antimetabolites on sex ratio, 163.

Mice: non-heritable coat color variation, a multiple recurrence, 3; himalayan, new allele of albino, 73; miniature, new gene for small size, 95; Springville, further observations on a new "luxoid," 122; pugnose—recessive mutation in linkage group 3, 145; linkage of wabbler-lethal and hairless, 159; Sombre, viable dominant mutant, 186; another allele at the *W* locus, 200; Opossum, a semi-dominant lethal mutation affecting hair and other characteristics, 223; hereditary spasticity, 241; linkage relationship of the waddler gene, with evidence for temperature effect on crossing-over, 279; position of luxoid in linkage group 2, 297.

Mink, chromosomes, 91.

Mormoniella, eye-color mutations from mutant stocks, 247.

Platyfish, deleterious effects of a gene causing excessive pigmentation, 292.

Rats: timidity and aggressive behavior, demonstration of the functions of genetic strain, 219; Fatty, a new mutation, 275.

Swine: multiple sire mating, factors influencing multiple paternity, 214; evolution of a new breed, the Minnesota No. 3, 265.

Tribolium confusum, genetic analysis of the "eyespot" mutation, 261.

Turkeys: dominant sex-linked late-feathering, 99; autosomal naked mutation and associated polydactylism in Beltsville Small White, 183.

Another Allele at the *W* Locus of the Mouse, Jack Ballantyne, *et al.*, 200.

Asmundson, V. S. and U. K. Abbott, Dominant Sex-Linked Late-Feathering in the Turkey, 99.

Autosomal Naked Mutation and Associated Polydactylism in Beltsville Small White Turkeys, H. K. Poole and S. J. Marsden, 183.

B

Baker, Guy N., *et al.*, The Inheritance of Hydrocephalus in Cattle, 135.

Baker, Marvel L., *et al.*, The Inheritance of Hydrocephalus in Cattle, 135.

Ballantyne, Jack, *et al.*, Another Allele at the *W* Locus of the Mouse, 200.

Bateman, Nigel, Sombre, A Viable Dominant Mutant in the House Mouse, 186.

Behavior Genetics, (Rev.), Clyde Keeler, 227.

Bemis, W. P. and N. Kedar, Inheritance of Morphological Abnormalities in Seedlings of Two Species of *Phaseolus*, 171.

Bennett, Dorothea, Miniature, A New Gene for Small Size in the Mouse, 95.

Bernstein, Marianne E. and Milciades Martinez-Gustin, Physical and Psychological Variation and the Sex Ratio, 109.

Bock, Fred G., *et al.*, Another Allele at the *W* Locus of the Mouse, 200.

Bohn, Guy Weston, Inheritance and Origin of Nectarless Muskmelon, A Yield-Reduc-

ing Mutant Character, 233.
Books Received: 21; 75; 132; 148; 213.

Books Reviewed:
Briquet, Raul, Jr., Licoes de Genetica, Part I, 98.
Fuller, John L. and W. Robert Thompson, Behavior Genetics, 227.
Müntzing, Arne, Genetic Research, 104.
Putnam, Carleton, Race and Reason, A Yankee View, 189.

Plant Genetics:

Agropyron: hybrids between *repens* and

desertorum, 13; natural and radiation-induced recombination in *Triticum-Agropyron* octoploids, 113.
Castor bean, seedlings as a teaching aid, 36.
Clover, red leaf marking in white, 295.
Cucumber, sex control, 5.
Fern, endomitosis in a polyploid series of prothalli, 139.
Jute: genetics of X-ray induced pigmentation, 83; new hybrid, 287.
Lilium, differential sensitivity to gamma irradiation, 67.
Lotus tenuis, inheritance of seed-coat mottling, 221.
Maize: selfing tube, 12; temperature-sensitive alleles of the Y_1 locus, 53; demonstration of waxy, 294.
Muskmelon, inheritance and origin of nectarless, yield-reducing mutant character, 233.
Neurospora, mutant locus determining abnormal morphology and ascospore lethality, 149.
Nicotiana, haploid deficient for two chromosomes, 203.
Pepper, inheritance of mutant-1 phenotype, 154.
Phaseolus, inheritance of morphological abnormalities in seedlings of two species, 171.
Potato, octoploid from eye-excision experiments, 191.
Stock, identification of somatic chromosomes in the ever-sporting type, 195.
Watermelon, Shipper, a new Fusarium wilt-resistant, 125.
Wheat: origin of genetic control of diploid-like behavior in polyploid, 22; natural and radiation-induced recombination in *Triticum-Agropyron* octoploids, 113.
